

Strathclyde Pension Scheme

Pension Pot

Our scheme works like a bank account. Your pension pot grows each year and is based on your actual yearly pay. You will get a 49th of your pensionable pay added to your pension account each year.

Death Benefits

A lump sum death grant of 3 times your assumed pensionable pay will be paid if you die in service as a member of the scheme.

Pension for dependents

On your death, pensions will be paid to your partner and eligible children.

Flexible Retirement

You can ease into retirement by reducing your hours or moving to a less senior position and taking some or all of your pension benefits.

AVC'S

You can boost your pension by paying more contributions which you would get tax relief on.
